<div data-bbox="240 331 673 661"></div> <p data-bbox="240 693 511 724">Display Slide W-2</p> <p data-bbox="240 798 673 871">Hypothermia will be covered in more detail in a few minutes.</p> <div data-bbox="240 1564 316 1638"></div> <p data-bbox="240 1669 673 1743">Allow the participants time to respond.</p>	<h3 data-bbox="706 331 982 367">Winter Storm Risk</h3> <p data-bbox="706 420 1510 567">Tell the group that winter storms are considered deceptive killers because most deaths are indirectly related to the storm. Use the slide to discuss the risks to human life caused by winter storms.</p> <ul data-bbox="706 588 1510 1417" style="list-style-type: none">▪ <u>Automobile or other transportation accidents</u>: This is the leading cause of death during winter storms.▪ <u>Exhaustion and heart attacks</u>: Caused by overexertion, these are the two most likely causes of winter storm-related deaths.▪ <u>Hypothermia and frostbite</u>: Elderly people account for the largest percentage of hypothermia victims. Many older Americans literally freeze to death in their own homes after being exposed to dangerously cold indoor temperatures.▪ <u>House fires</u>: These occur more frequently in the winter because of the lack of proper safety precautions when using alternate heating sources (unattended fires, disposal of ashes too soon, improperly placed space heaters, etc.). Fire during winter storms presents a great danger because water supplies may freeze, and it may be difficult for firefighting equipment to get to the fire.▪ <u>Asphyxiation</u>: In an effort to get warm, people asphyxiate because of improper use of fuels such as charcoal briquettes, which produce carbon monoxide. <h3 data-bbox="706 1470 1112 1501">Elements of Winter Storms</h3> <p data-bbox="706 1564 1453 1596">What are some of the elements of winter storms?</p>

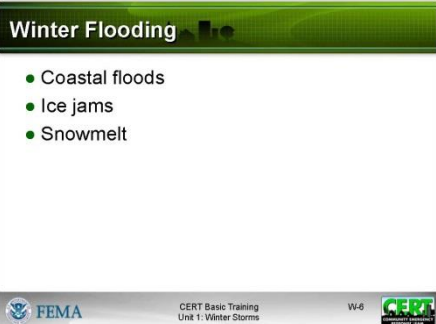

**COMMUNITY EMERGENCY RESPONSE TEAM
WINTER STORMS**

INSTRUCTOR GUIDANCE	CONTENT
 <p>Display Slide W-3</p>	<p>Use the slide to elaborate on the elements of winter storms. Explain that the elements of winter storms include:</p> <ul style="list-style-type: none">▪ Heavy snow▪ Ice – perhaps the greatest danger of all!▪ Winter flooding▪ Cold <p>Heavy Snow</p> <p>Tell the group that heavy snow can:</p> <ul style="list-style-type: none">▪ Immobilize regions and paralyze cities.▪ Strand commuters.▪ Close airports.▪ Disrupt emergency and medical services. <p>Point out that accumulations of snow can cause roofs to collapse and knock down trees and power lines. Homes and farms may be isolated for days, and unprotected livestock may be lost. The cost of removing snow and repairing damage, and the resulting loss of business, can have severe economic impacts on cities and towns.</p> <p>Explain that in the mountains, heavy snow can lead to masses of tumbling snow called avalanches. More than 80 percent of midwinter avalanches are triggered by a rapid accumulation of snow, and 90 percent of those occur within 24 hours of snowfall.</p> <p>Caution the group that an avalanche may reach a mass of a million tons and travel at speeds of up to 200 miles per hour (mph).</p>

 <p>Types of Snow</p> <ul style="list-style-type: none">• Blizzards• Blowing snow• Snow squalls• Snow showers <p>FEMA CERT Basic Training Unit 1: Winter Storms W-4</p> <p>Display Slide W-4</p>	<h3>Types of Snow</h3> <p>Define the different kinds of snowfall:</p> <ul style="list-style-type: none">▪ <u>Blizzards</u> are accompanied by winds of 35 mph or more with snow and blowing snow, reducing visibility to less than one-quarter mile for at least 3 hours.▪ <u>Blowing snow</u> is wind-driven snow that reduces visibility. Blowing snow may be falling snow and/or snow on the ground that is picked up by the wind.▪ <u>Snow squalls</u> are brief, intense snow showers accompanied by strong, gusty winds. Accumulation may be significant.▪ <u>Snow showers</u> are a short duration of moderate snowfall. Some accumulation is possible. <h3>Ice</h3> <p>Explain that heavy accumulations of ice can disrupt communications and power for days while utility companies repair extensive damage. Even small accumulations of ice can be extremely dangerous to motorists and pedestrians. Bridges and overpasses are particularly dangerous because they freeze before other surfaces.</p>
 <p>Ice</p> <ul style="list-style-type: none">• Sleet• Freezing rain• Ice storm <p>FEMA CERT Basic Training Unit 1: Winter Storms W-5</p> <p>Display Slide W-5</p>	<p>Define the different kinds of ice:</p> <ul style="list-style-type: none">▪ <u>Sleet</u>: Raindrops that freeze into ice pellets before reaching the ground are called sleet. Sleet usually bounces when hitting a surface and does not stick to objects. Sleet, however, can accumulate like snow and cause a hazard to motorists.▪ <u>Freezing rain</u>: Rain that falls onto surfaces with temperatures below freezing—causing it to freeze to those surfaces is called freezing rain. Even small accumulations of ice can cause a significant hazard.▪ <u>Ice storm</u>: Ice storms occur when freezing rain falls and freezes immediately on impact. Communications and power can be disrupted for days.

 <p>Winter Flooding</p> <ul style="list-style-type: none">Coastal floodsIce jamsSnowmelt <p>FEMA CERT Basic Training Unit 1: Winter Storms W-6</p>	<h3>Winter Flooding</h3> <p>Explain that winter storms can generate flooding, resulting in significant damage and loss of life.</p> <p>Point out that winter flooding includes:</p> <ul style="list-style-type: none"><u>Coastal floods</u>: Winds generated from intense winter storms can cause widespread tidal flooding and severe beach erosion along coastal areas.<u>Ice jams</u>: Long cold spells can cause rivers and lakes to freeze. A rise in the water level or a thaw breaks the ice into large chunks that become jammed at manmade and natural obstructions. An ice jam can act as a dam, resulting in severe flooding.<u>Snowmelt</u>: A sudden thaw of a heavy snow pack that often leads to flooding.
<p>Display Slide W-6</p>  <p>Cold</p> <ul style="list-style-type: none">WindchillFrostbiteHypothermia <p>FEMA CERT Basic Training Unit 1: Winter Storms W-7</p>	<h3>Cold</h3> <p>Point out that exposure to cold can cause frostbite or hypothermia and become life threatening. Infants and the elderly are the most susceptible.</p> <p>Tell the group that what constitutes extreme cold varies in different parts of the country:</p> <ul style="list-style-type: none"><u>In the south</u>, near-freezing temperatures are considered extreme cold. Vegetation may be damaged and pipes may freeze and burst.<u>In the north</u>, extreme temperatures are well below zero.
<p>Display Slide W-7</p>	

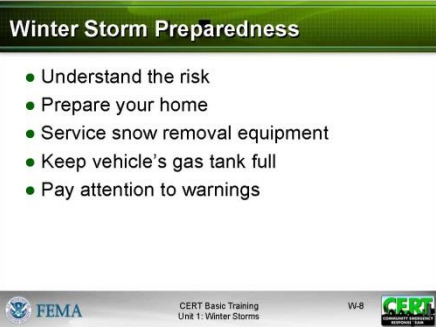

**COMMUNITY EMERGENCY RESPONSE TEAM
WINTER STORMS**

INSTRUCTOR GUIDANCE	CONTENT
	<p>Tell the group that, when talking about cold, they should consider:</p> <ul style="list-style-type: none">▪ <u>Wind chill</u>: Wind chill is not the actual temperature, but rather how wind and cold feel on exposed skin. As the wind increases, heat is carried away from the body at a faster rate, driving down the body's temperature. ▪ <u>Frostbite</u>: Frostbite is damage to body tissue caused by extreme cold and resulting in a loss of feeling and a white or pale appearance in extremities, such as fingers, toes, ear lobes, or the tip of the nose. Frostbite victims require immediate medical treatment. If you must wait for help, slowly rewarm the affected areas. If signs of hypothermia appear, however, warm the body core before the extremities. ▪ <u>Hypothermia</u>: Hypothermia occurs when the body temperature drops below 95 degrees Fahrenheit. Hypothermia can kill. For those who survive, there are likely to be lasting kidney, liver, and pancreas problems. If you suspect hypothermia, take the person's temperature. If it is below 95 degrees Fahrenheit, seek medical care immediately! If medical care is not available, warm the person slowly, starting with the body core. Warming the arms and legs first drives cold blood toward the heart and can lead to heart failure. Dress the person in dry clothing and wrap him or her in a warm blanket, covering the head and neck. Do not provide alcohol, drugs, coffee, or any hot beverage or food. Warm broth is the first food to offer.

<p data-bbox="240 338 315 411"></p> <p data-bbox="240 443 646 516">Allow the participants time to respond.</p> <div data-bbox="240 554 675 879"><p data-bbox="248 569 483 596">During a Winter Storm</p><ul data-bbox="264 621 623 730" style="list-style-type: none">• Stay indoors and dress warmly• Eat and drink regularly• Conserve fuel• If outside, protect yourself from hazards<p data-bbox="248 848 675 879"> CERT Basic Training Unit 1: Winter Storms W-9 </p></div> <p data-bbox="240 919 505 951">Display Slide W-9</p>	<p data-bbox="706 331 1365 363">What should you do <u>during</u> a winter storm?</p> <p data-bbox="706 554 1511 627">Summarize the discussion using the information from the slide below. Be sure to make the following points:</p> <ul data-bbox="706 646 1511 1640" style="list-style-type: none">▪ <u>Stay indoors and dress warmly.</u> Wear layers of loose-fitting, lightweight, warm clothing. When necessary, remove layers to avoid perspiration and subsequent chill.▪ <u>Eat and drink regularly.</u> Food provides the body with energy for producing its own heat. Drink liquids such as warm broth or juices to prevent dehydration. <u>Avoid caffeine and alcohol.</u> Caffeine, a stimulant, accelerates the symptoms of hypothermia. Alcohol is a depressant and hastens the effects of cold on the body. Alcohol also slows circulation and can make you less aware of the effects of cold. Both caffeine and alcohol can cause dehydration.▪ <u>Conserve fuel.</u> Great demand may be placed on electric, gas, and other fuel distribution systems (fuel oil, propane, etc.). Suppliers may not be able to replenish depleted supplies during severe weather. Lower the thermostat to 65 degrees Fahrenheit during the day and 55 degrees at night. Close off unused rooms, stuff towels or rags in cracks under doors, and cover windows at night.▪ <u>If outside, protect yourself from hazards.</u> Dress warmly, keep dry, and watch for signs of hypothermia and frostbite. Avoid overexertion. Walk carefully when on snowy, icy sidewalks, and use public transportation, if possible.
